Work Experience

Full Stack Engineer
GR8 People – Yardley, PA (Remote)
(August 2021 – April 2024)
- Worked on integrating and syncing GR8 People's customer data (historical and real-time) to LinkedIn using their API for Talent Solutions
- Modernized campaign email and SMS messaging systems from ColdFusion to microservice system and redesigned frontend with our tech stack (Go, DynamoDB, GraphQL, React)

Senior Software Engineer
Custom Learning Designs – Belmont, MA
(December 2017 – August 2021)
- Led frontend project in developing a new version of the company's primary eLearning software from the ground up in Angular working with designers and stakeholders
- Built many internal tools and scripts to automate tasks to improve production time of generating hundreds of customized versions of eLearning software using Node.js and Ruby
- Developed various eGames and eLearning software with Vue and Firebase

Full Stack Developer
Wayfair – Boston, MA
(September 2016 – November 2017)
- Worked on the Storefront Promotions team in charge of the subset of pages involving Major Promotions and Holiday Events as well as Clearance and Closeout deals
- Created an internal backend tool with PHP/SQL/React for creating and scheduling Major Promotions in a tight deadline before the holiday season
- Converted legacy frontend code to React for various components owned by our team

Skills
